ABOUT US

CIC PLAST is a reliable supplier of polymer and textile raw materials, serving customers across international markets. Through a strong network of manufacturing partners and industry expertise, the company provides high-quality products and dependable supply solutions tailored to customer requirements.

Our operating philosophy is to provide customers with products that meet their required specifications, supported by professional communication, competitive pricing, and timely delivery. A customer-oriented approach, combined with market knowledge and continuous follow-up, enables the delivery of consistent value to business partners worldwide. Access to a wide range of polyester yarns, fibers, and related textile raw materials from trusted production sources provides additional flexibility in serving diverse customer requirements.

CIC PLAST is specialized in supplying Polyester Textured Yarn (DTY), FDY, Polyester Fiber, and other textile raw materials to customers worldwide. Working closely with established manufacturing facilities and quality-focused production partners, we ensure that products are delivered in accordance with agreed technical specifications and commercial expectations.

Committed to long-term cooperation, the company supports customers across different markets with professional service, transparent business practices, and reliable supply solutions. Through dedication, responsiveness, and industry expertise, **CIC PLAST** continues to build sustainable business relationships and create value for clients worldwide.

CIC PLAST is a team of professionals dedicated to understanding market demands and providing practical solutions that support the growth and success of its business partners.

PRODUCT DETAILS

PRODUCT FEATURES :

- 1) Our machines are make ATE-12S the latest machinery designed by Aalidhra on special customization for us to make the best export quality material.
- 2) 100% of our machinery comprises of OLT (On-Line Tension) systems to make the best quality for our customers.
- 3) Our machines have been designed in a way that the yarn will be spotlessly clean without any marks and without any oil stains.
- 4) We use white oil for the yarn so there is no Yellowness at the yarn stage & subsequently the fabric.
- 5) We manufacture our own cartons and paper tubes, to give our customers an uncompromised quality.

SOME SALIENT FEATURES OF OLT SYSTEMS :

- 1) It controls the tension variation in the yarn eliminating the possibility of Barring/lines/stripes in the fabrics.
- 2) One of the most important feature of the new OLT systems is that is controls the difference of weight in Even Package individually from spool to spool.
- 3) There will be 100% evenness in the yarn.
