STRETCH FILM

Production based on your Requested Technical Specifications

HAND STRETCH FILM

Since packaging with stretch film is very fast, easy, and cost-effective, its use has become widespread today, covering everything from large industries to household applications. Hand Stretch Film is used for limited packaging needs, including household items (for storage or moving), food packaging, repair shop uses, and limited industrial applications. CIC PLAST's Hand Stretch Film is offered in widths ranging from 5 to 50 cm, in various diameters and colors.

MACHINE STRETCH FILM

This film is of the CPE type and is produced using the Cast Extrusion Multi-Layer method in 3 - 5 layers, designed for use in automatic and semi-automatic machines.

The stretch film produced by CIC PLAST, with high flexibility and stretchability, is available in widths ranging from 10 cm to 150 cm, thicknesses from 17 to 33 microns, and in various colors.

BAND ROLL STRETCH FILM

One of the economical, easy, and widely-used applications of stretch film is 'Band Rolls,' which are produced in the form of small, narrow strips. Band rolls are commonly produced with widths of 5, 7.5, 10, 12.5, 15, and 20 cm, and in various thicknesses.

They can also be produced in both transparent and colored forms. Additionally, different core diameters such as 2, 3, 4, and 5 cm are used for producing this type of stretch film.

Some of the uses of this film include automotive repair shops, small packaging, packaging of wires and cables, hoses, car tires, irrigation tapes, and more.
